

Dear Colleagues,

During our Town hall gathering on April 29th we had the opportunity to introduce to you our objective to obtain RC14001 certification for Muntajat.

It is a pleasure now to confirm that we are in the process of signing the **Declaration of Support for the Responsible Care** as a member of GPCA. By doing that we also pledge to operate our business according to the **Responsible Care Guiding Principles**.

The meaning of these principles for our activities is important. During the period of preparation for the RC14001 certification matters must be included in our document system. In many cases this will require a reference to RC14001 in existing documents without many other changes. This may not always be the case. Other areas of attention are communication and training. Since during the Certification Assessment all departments will be visited by the external assessor and all staff can be interviewed, this process requires everybody's support.

We have committed ourselves to this program because it is an essential step in our strategy to position Muntajat as the leading Marketing, Sales & Distribution Company for Chemical & Petrochemical products.

Your full cooperation will be appreciated.

Thank you,

Abdulrahman Ali Al-Abdulla
Chief Executive Officer

Qatar Chemical and Petrochemical Marketing and Distribution Company (Muntajat)

Declaration of Support for the Responsible Care®

Qatar Chemical and Petrochemical marketing and Distribution Company

**a member of GPCA, is proud to pledge its support for
Responsible Care®**

As a member company, we will work with GPCA to:

1. Adopt Global Responsible Care Core Principles.
2. Implement Fundamental Features of GPCA Responsible Care Programmes.
3. Commit to Advancing Sustainable Development.
4. Continuously Improve and Report Performance.
5. Enhance the Management of Chemical Products Worldwide – Product Stewardship.
6. Champion and Facilitate the Extension of Responsible Care along the Chemical Industry's Value Chain.
7. Actively Support GPCA and Global Responsible Care Governance Processes.
8. Address Stakeholder expectations about Chemical Industry activities and products.
9. Provide appropriate resources to effectively implement Responsible Care.

In committing the company to the Responsible Care®, I also agree to clearly demonstrate my personal commitment to the Responsible Care® program. I will set performance targets, allocate clear roles, responsibilities and accountabilities within the company and provide resources, training and management support to meet this commitment.

GPCA And Its Member Companies

are proud to participate in the
Responsible Care®
Initiative.

We pledge to operate our business according to the following

Guiding Principles

Responsible Care® is the global chemical industry's health, safety, security and environment initiative that drives continuous improvement in performance. Responsible Care® is both an ethic and a commitment seeking to build confidence and trust in an industry that is essential for sustainability. These objectives are achieved by implementing the following guiding principles:

- To lead our companies in ethical ways that increases the benefits to society by protecting our people, environment and community.
- To design and operate our facilities in a safe, secure and environmentally sound manner.
- To instill a culture throughout all levels of our organizations to continually identify, reduce and manage occupational and process safety risks.
- To steward our products and services through each life cycle stages in order to protect people and the environment.
- To promote pollution prevention, minimization of wastes and conservation of energy and other critical resources.
- To counsel customers and stakeholders on the safe use, transportation and disposal of chemical products.
- To work with Governments, Agencies and Associations at all levels in the development of effective and efficient health, safety, security and environmental laws and industry standards.
- To recognize, respect and respond to community concerns about our products and operations.
- To extend knowledge by conducting or supporting research on the health, safety and environmental effects of our products and waste material management.
- To measure performance, openly report and make continual progress towards our goal of eliminating accidents, injuries or harm to human health and the environment from our products and operations.
- To seek continual improvement in our integrated Responsible Care Management System® to address health, safety, security and environment performance.
- To promote the principles and practices of Responsible Care by sharing experiences and offering assistance to others who produce, handle, use, transport or dispose of chemicals.
